KnownFor

A LOOK AT THE KNOWNFOR SCREENS

Is AI recommending you, or your competitor?

What reaches you every week, in three real screens.

Sample report (page 1)

The inspection report for our sample company (Mihon (Sample) Co., Ltd.). The first two lines give the conclusion. The figures are sample data.

This week's move, every week
p. 2

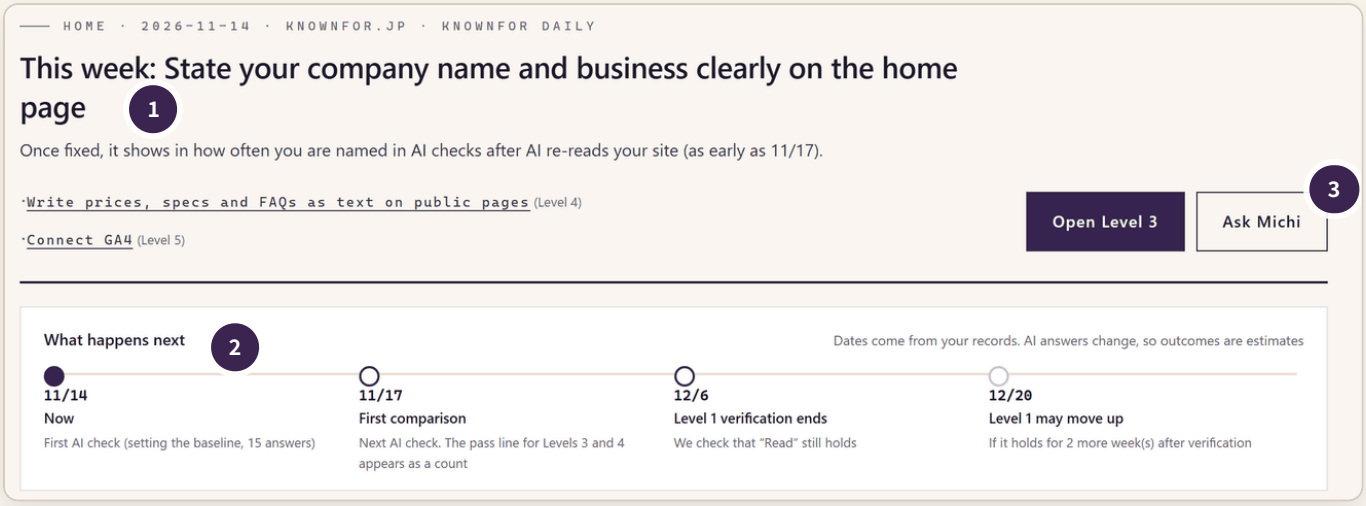

02
Stuck? Ask your AI guide
p. 3

03
Grow through five levels
p. 4

01 · EVERY WEEK

One thing to do, every week.

When you sign in, the first thing you see is **this week's move**: the top item in the order of fixes, and only that. Below it, dates show **when, and in which number, the fix should show up**.

Home (top part). Screens are from our own site (knownfor.jp), 14 November 2026.

1 This week's move

The top item in the order of fixes, with a **statement of work** your web vendor can use as is.

2 What happens next

The next comparison and the date a level may move up are set from your records automatically.

3 Ask

Not sure? Ask the AI guide for that level right there (next page).

The weekly cycle

KnownFor **Inspects and asks AI** → KnownFor **Sends this week's move** → You or your vendor **Fix and publish** → KnownFor **Shows the effect in numbers**

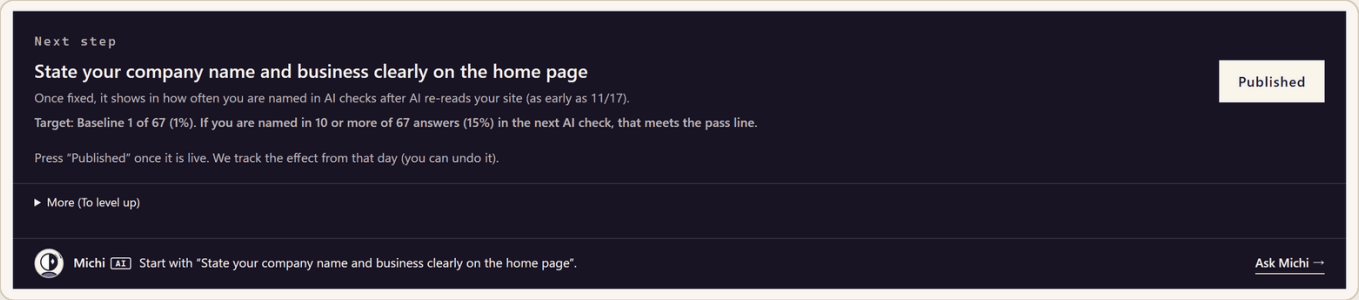

After you sign up, there is nothing for you to operate.

Inspections, AI answer checks and reports arrive every week.

02 · YOUR AI GUIDES

Stuck? Ask your AI guide.

Each of the five levels has its **own AI guide**. It reads your records before it answers, and it makes proposals.

The "next step" on the Level 3 page, with the pass line (as a count) and a line from the level's AI guide.

1 **Answers from your records**

Not general advice: answers come from your inspections and AI check records.

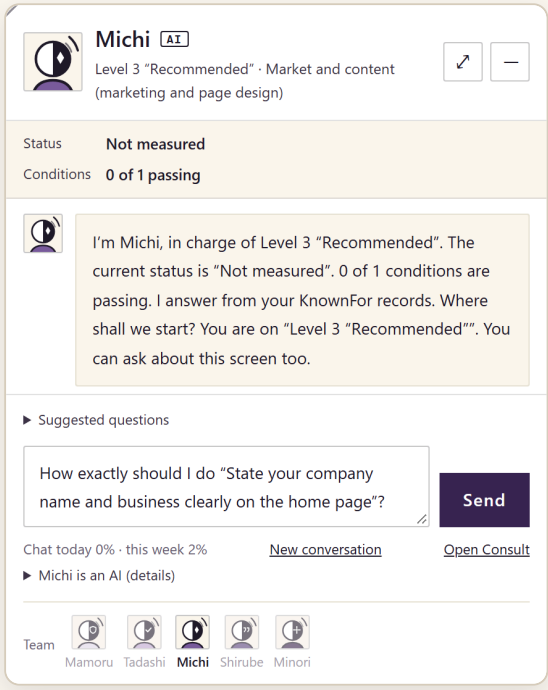

2 **Proposes, then acts on your approval**

Adding competitors or revising questions comes as a proposal. Nothing changes until you press the button.

3 **All five are AI**

Each level has a specialist AI guide in place of a human account manager.

Mamoru	Tadashi	**Michi**	Shirube	Minori
Level 1	Level 2	Level 3	Level 4	Level 5

Michi (AI), in charge of Level 3. You can talk while looking at the screen.

03 · FIVE LEVELS

See how your site grows, level by level.

The yardstick is our published **GEO maturity** (Levels 1–5). You reach a level when its conditions are met, and a level can also go down.

Screens are as of 14 November 2026; wording and layout may change. What the screens call a “scan” is what this document calls an inspection. AI guide answers are written by AI, and AI answers change, so outcomes are shown as estimates.
